

Agrilek is a multi-disciplined engineering company which has evolved over the past 25 years within Barrow's shipbuilding community. During this period the Cumbrian coastline has seen an explosion of onshore and offshore activities driven by the energy and power industries. Throughout, we have continuously developed our core capabilities to suit the demands of this growing sector, resulting in the company being ideally positioned to support a range of specialist offshore and marine partners. Agrilek has the design, construction and maintenance expertise to manage a broad range of fabrication activities including steelwork, pipework and coded welding combined with electrical HV/LV control and instrumentation installations. We have project managed numerous major contracts and have acted as the CDM Principal Contractor on several turnkey projects.

offshore installation & maintenance

Over recent years Agrilek has expanded its activities into the offshore sector founded on experience producing material to offshore specifications for Costain Oil & Gas and Centrica. The company's extensive wind farm industry involvement now sees Agrilek supporting this thriving sector offshore with trained personnel.

- Barrow Offshore Windfarm - Vestas/KBR
- Robin Rigg Offshore Windfarm - E.ON
- North and South Morecambe Gas Fields - Centrica

dockyard improvement

From the company's formative years, Agrilek has been involved both directly and indirectly as a provider of M&E services across a range of improvement programmes.

- Reactivation of Berth Services
- Gantry Crane Refurbishments
- Nuclear Core Load Training Facility
- Dockside Wastewater Treatment Facility
- Astute Control Room
- Enhancements and modifications to Building Services

shipbuilding & repair

We have participated in a number of ship construction projects within the UK for both the Royal and Merchant Navy.

- HMS Ocean LPD
- RFA Wave Knight
- James Fisher & Sons Nuclear Fleet
- Westminster Dredging Vessels
- Brunei Corvette
- Various Offshore Supply Vessels

dockside & slipway installations

Agrilek have been involved with the RNLI and Royal Haskoning for over 10 years and have supported them on a number of lifeboat station refurbishments. We also have completed various dockside installations working mainly within the tidal zone.

- Port Erin, Isle of Man Lifeboat Station
- Barrow Lifeboat Station
- Slipway Reactivation - BAE Systems
- Tenby Lifeboat Station
- Port of Workington, Tidal Access Platform
