

To many, Agrilek Limited is synonymous with electrical contracting. In fact today's multi-disciplined engineering company evolved from an electrical contracting partnership, established in 1982.

Our electrical contracting division is able to provide a comprehensive service to a varied client base within the industrial, commercial and domestic sectors.

From maintenance call-outs & repairs, to complete design & build projects; our skilled and experienced workforce undertakes jobs of all sizes and complexity. On larger or more technically demanding projects, Agrilek Limited has its own specialist divisions.
