

process pipework

engineering

Agrilek Limited's Engineering Division compliments its steelwork fabrication with a fully integrated, high quality mechanical and process pipework section. Through customer demands, for the on and off-shore oil and gas industry, this has developed into a significant part of the Engineering Division's capabilities.

Agrilek's ability to deliver lies in its depth of experience and knowledge developed from a multitude of Mechanical Construction and Repair and Maintenance projects that have been successfully undertaken since 1995.

Our resident team of engineers offer comprehensive procurement and manufacture through to final document handover and pre-commissioning activities.

services

- Multi-disciplined Project Management and Design
- Quality assurance and control to BS EN ISO 9001:2000
- Safety, Human resources
- Fabrication and installation of process pipework
- Repair and Maintenance
- Coded Welding to Lloyds accreditation
- Fabrication and installation of utility pipework
- Welding of ferrous and non-ferrous materials
- Testing and commissioning
- Machinery and equipment installation
- Ship repairs
- NDT Testing

welding

- **Approval:-** to EN288/ASMEIX/ASME B31.3/NACE/NORSOK
- **Materials:-** Carbon Steels, Low Temp, Stainless Steel, Duplex, Super Duplex, Chrome Moly, CuNi, Monel, Inconel alloys, and Aluminium alloys
- **Processes:-** TIG, MMA, MIG, MAG, Submerged Arc, Fully Automated Orbital Welding and Fully Automated Tube Welding
- **Capabilities:-** Oil & Gas, Petrochemical, Power Generation, Shipbuilding, Water Utilities, Semiconductor, Pharmaceutical, Aerospace, Breweries, and Food & Dairy
