

steelwork fabrication

Agrilek Limited Engineering Division has been involved in steel fabrication and construction since 1995, in which time we have gained BS EN ISO 9001:2000 Quality Management System accreditation.

Typical fabrication include vessel manufacture, structural steelwork/ secondary steelwork, up to 300 tonne, sheet metalwork and cladding, architectural metalwork, staircases, mezzanine flooring, platforms, walkways, balustrade, ladders, and fire escapes.

Our resident engineering team fabricate the steelwork in our fabrication facility, and then erect and install on site, therefore ensuring continuity of the highest manufacturing standards.

sample clients

- BAE Systems
- Balfour Beatty Construction Ltd
- Centrica - British Gas (HRU)
- Brown & Root AOC
- BNFL
- Costain Oil, Gas and Process Ltd
- Costain Petrofac
- GlaxoSmithKline
- IGE Energy Services (UK) Ltd
- HMB Alliance
- James Fisher & Sons PLC
- Royal National Lifeboat Institution
- United Utilities

engineering

services

- Multi-disciplined Project Management and Design
- Fabrication and erection of steelwork and metalwork
- Sheet metalwork and Cladding
- Fabrication and installation of utility pipework
- Coded Welding to Lloyds accreditation
- Welding of ferrous and non-ferrous materials
- Ship repairs
- Engineering Maintenance
- NDT Testing
- Machinery and equipment installation
